PROFESSIONAL SUMMARY

Python backend and full-stack developer with 2+ years of industry experience building production-grade web applications and RESTful APIs. Proficient in Django, PostgreSQL, MongoDB, Docker, and ERP integration. Experienced in agile, cross-functional teams; committed to clean, scalable, and maintainable code aligned with enterprise engineering standards.

TECHNICAL SKILLS

Languages:	Python, C, Java, JavaScript, HTML5, CSS3
Frameworks:	Django, Django REST Framework, React.js, Bootstrap
Databases:	PostgreSQL, MongoDB (Atlas), SQLite, SQL
DevOps & Tools:	Docker, Linux, Git, GitHub, Figma
Specialisations:	RESTful API Design, ERP Integration, OOP, Full-Stack Development
Soft Skills:	Analytical Thinking, Cross-functional Collaboration, Adaptability

EDUCATION

Bachelor of Computer Application (BCA) <i>IHRD College of Applied Science, Chelakkara University of Calicut</i>	CGPA: 6.8 2021 – 2024
Higher Secondary (12th) - Computer Science <i>SMTGHSS, Chelakkara, Thrissur Kerala State Board</i>	93% 2019 – 2021
Secondary School (10th Grade) <i>LFGHSS, Chelakkara, Thrissur Kerala State Board</i>	78% 2019

PROFESSIONAL EXPERIENCE

Backend Python Developer <i>Alkor Cyber Space Kerala, India</i>	Nov 2025 – Present
- Architect and maintain scalable backend services using Python and Django REST Framework, delivering high-performance RESTful APIs consumed by web and mobile client applications in production. - Lead end-to-end ERP integration projects, designing API-driven data pipelines that automate cross-departmental workflows and eliminate manual data entry across operational teams. - Design and optimise PostgreSQL and SQLite database schemas for data-intensive modules, writing efficient queries and indexing strategies that improve response times in production environments. - Containerise application services using Docker, standardising the development-to-production pipeline and eliminating environment-related inconsistencies across staging and deployment. - Enforce engineering best practices through structured Git branching strategies, pull request reviews, and REST API standards; collaborate closely with front-end teams via Figma design handoffs.	

Python Full Stack Developer

Aug 2024 – Aug 2025

ALTOS Technologies | Kochi, Kerala, India

- Engineered full-stack web applications using Django MVC for server-side logic and HTML5, CSS3, Bootstrap, and JavaScript for responsive, cross-browser front-end interfaces.
- Applied object-oriented design patterns and SOLID principles to build modular, reusable codebases, accelerating feature delivery across multiple concurrent client projects.
- Owned complete feature lifecycle - from requirement gathering and database schema design to API development, front-end integration, and user acceptance testing.
- Collaborated in iterative sprint-based workflows, consistently delivering features on schedule while maintaining code quality through documentation and peer review.

KEY PROJECTS

Blockchain-Based Rental Service Platform | Python, Django, Blockchain, PostgreSQL

Decentralised rental marketplace enabling property owners to list assets and users to transact securely. Implemented an immutable distributed ledger layer to record all transactions, eliminating fraud risk and providing full audit transparency - addressing a critical trust gap in informal property rental markets.

Personal Finance Tracker | Python, Django, Chart.js, SQLite

Full-stack financial management application with multi-category expense tracking, dynamic chart-based reporting, budget forecasting, and role-based secure authentication. Enables users to gain actionable insights into spending behaviour and plan long-term savings with visual analytics.

Multi-Role Job Portal | Python, Django, Bootstrap, PostgreSQL

Three-tier recruitment platform (Admin, Employer, Job Seeker) with role-specific dashboards, access controls, job posting workflows, application tracking, and candidate filtering - designed to closely mirror the functionality of enterprise-grade HR management systems.

CERTIFICATION

- Python Full Stack Development - ALTOS Technologies, Kochi (2024).

ACHIEVEMENTS & EXTRACURRICULAR

- National Service Scheme (NSS) Volunteer, IHRD College of Applied Science - contributed 120+ hours to community development initiatives and social welfare programmes under University of Calicut, developing leadership, teamwork, and civic responsibility skills.
- Active open-source contributor on GitHub (github.com/sooryaah) - maintaining personal Python and Django projects with clean, documented codebases that reflect industry-standard development practices.
- Consistently recognised for strong analytical thinking and problem-solving ability across academic and professional environments, receiving positive feedback from supervisors for delivering quality software solutions under tight deadlines.

DECLARATION

I hereby declare that all information furnished in this resume is accurate and complete to the best of my knowledge. I accept full responsibility for its authenticity.

Place: Chelakkara, Thrissur

Date: 29 April 2026
